CHICAGO2019
the AMERICAN PROSTHODONTIC SOCIETY

Welcome to the 91st Annual Meeting of the American Prosthodontic Society, where we will discuss the future of prosthodontics and the possibilities that arise from interdisciplinary collaboration.

Over 1.5 days, you will enjoy relevant education in advanced prosthodontics, interdisciplinary instruction led by world-renowned experts and networking and social events designed to inspire good conversation and build worthwhile relationships.

The APS is the only organization that combines the discipline, specialty and technology of prosthodontics. Our membership includes specialists, general dentists, certified and master dental technologists and students. The APS has earned the reputation of being the singular organization with unrestricted membership where all that is required is an interest in prosthodontics. There is no better organization than the APS to bring together the talent, the insight and the experience of practicing dentists, researchers, dental school faculty and administrators and technologists in one meeting devoted to the advancement of prosthodontics.

ADA CER·P® | Continuing Education
Recognition Program

The American Prosthodontic Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. APS designates this activity for 14 continuing education credits.

Survey and Continuing Education Information

An overall evaluation of the meeting will be sent post-event. To receive a continuing education letter, attendees must submit a CE claim form. Forms will be sent via email following the event.

NOT ALREADY A MEMBER? COME GROW WITH US

We invite you to apply for membership, whether you're a generalist, specialist, technologist or student, you will find a professional home in APS. Membership applications are available at the Registration Desk, or you can sign up online at prosthodontists.org.

APS Mission Statement

To promote the advancement of the discipline of prosthodontics by integrating the generalist, specialist and dental laboratory technologist in a manner that will continuously seek improvement of patient treatment. We will accomplish this through education and research.

Graduate Prosthodontic Program

The APS is focused on the future of prosthodontics. With that focus in mind, the APS has attracted an exciting field of graduate student candidates for the 2019 Research Competition. Recruited by Dr. John Ball, they will be presenting original work over a wide range of topics. The mission of this program is to provide an annual forum for graduate students to foster high-quality research, enhance oral presentation skills and prepare for the opportunity to publish in the Journal of Prosthetic Dentistry. Furthermore, the APS welcomes the opportunity to develop stronger ties to prosthodontic graduate students and cultivate their future leadership in the Society.
