**CHICAGO2018**  
the AMERICAN PROSTHODONTIC SOCIETY

## **Welcome to the 90<sup>th</sup> Annual Meeting of the American Prosthodontic Society, where we will explore the future of prosthodontics as an ever-evolving discipline.**

Over 1.5 days, you will enjoy relevant education in advanced prosthodontics, interdisciplinary instruction led by world-renowned experts, and networking and social events designed to inspire good conversation and build worthwhile relationships.

The APS is the only organization that combines the discipline, specialty and technology of prosthodontics. Our membership includes specialists, general dentists, certified and master dental technologists and students. The APS has earned the reputation of being the singular organization with unrestricted membership where all that is required is an interest in prosthodontics. There is no better organization than the APS to bring together the talent, the insight and the experience of practicing dentists, researchers, dental school faculty and administrators and technologists in one meeting devoted to the advancement of prosthodontics.

### **ADA CERP®** | Continuing Education Recognition Program

The American Prosthodontic Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. APS designates this activity for 14 continuing education credits.

#### **Claiming Your CE**

A link to the overall conference survey and session surveys will be sent at the conclusion of the meeting. You will need to indicate the sessions you attended in order to claim your CE.

# GRADUATE PROSTHODONTIC PROGRAM

The APS is focused on the future of prosthodontics. With that focus in mind, the APS has attracted an exciting field of graduate student candidates for the 2018 Research Competition. Recruited by Dr. John Ball, they will be presenting original work over a wide range of topics. The mission of this program is to provide an annual forum for graduate students to foster high-quality research, writing and oral presentation skills.

Furthermore, the APS welcomes the opportunity to develop stronger ties to prosthodontic graduate students and cultivate their future leadership in the Society.
