

The American Prosthodontic Society 2024 Webinar Series - December

Speaker – Dr. Miguel A. Ortiz

Title

The Neuroscience of Dentistry

Abstract

A new and different lecture and approach on the color theory and color communication with the laboratory. A way to understand how the human mind collects and process information.

Learning Objectives

- Understanding the process of information gathering by the human system.
- Find the limitations of information gathering and the nature of reality.
- Recognizing that color perception and communication requires other methods than the ones being thought today.
